PART 1 GENERAL

1.1 REFERENCES

Various publications are referenced in other sections of the specifications to establish requirements for the work. These references are identified in each section by document number, date and title. The document number used in the citation is the number assigned by the standards producing organization (e.g., ASTM B564 Standard Specification for Nickel Alloy Forgings). However, when the standards producing organization has not assigned a number to a document, an identifying number has been assigned for reference purposes.

1.2 ORDERING INFORMATION

\*\*\*\*\*  
**NOTE: This paragraph is automatically edited when processed using SpecsIntact. The processor removes those organizations not included in other sections of the project specifications when SpecsIntact (Reconcile Addresses item from the Print menu) is used for job processing. However, if publications of organizations in addition to those listed below are used in the project, add such organizations to this paragraph.**  
\*\*\*\*\*

The addresses of the standards publishing organizations whose documents are referenced in other sections of these specifications are listed below, and if the source of the publications is different from the address of the sponsoring organization, that information is also provided.
